Ref Items: 83D.15.3 A six point Wheeling Police star #101, and;

83.D.15.4 My scrap book relating to my career as a member of the Wheeling Police Department as indicated in a letter/receipt dated October 19, 1983.

I am in possession of the above two items. Some time after depositing them with the Wheeling Historical Society Museum, I needed the scrap book to research some information. After several inquiries I was advised that the above items had been loaned to the Wheeling Police Department where copies of photos and papers were made. I retrieved the old star and scrap book from the police department.

Some of the copies of photos and information were displayed at Randhurst a few weeks ago as part of a display on the history of the Wheeling Police Department by Officer Rick Schleffler, Department Historian.

Hope the above information helps clarify your records. All other items on a list Rudy gave me are correct.

Sincerely,

Marvin O. 'Syke' Horcher
Chief of Police, Retired

Re: Fire Department Accountability Helmet Shields

Enclosed are several Wheeling Fire Department helmet shields that were used in the early to late -1990's. During this time, the regional fire service was developing an accountability program to be used track personnel during large scale incidents. One aspect of the program involved "color-coding" of personnel by way of their helmet shield. This program involved:

- Department's MABAS abbreviation (i.e. identify the department) – WHEL = Wheeling
- Colors –
 - White background, orange letters = fire officer/vehicle officer
 - Orange background/white letters = firefighter
 - Yellow background/blue letters = ambulance personnel (ambulance crew)
- Letter and number – unit or vehicle type and department unit number
 - A = Ambulance
 - E = Engine
 - T = Truck
 - S = Squad
 - R = Reserve or backup vehicle/unit
 - Only numbers = chief officer (ex. Wheeling Fire Chief = 2400)
- Velcro backing – this allowed the individual to move to different vehicles throughout the shift (i.e. jump company) or to another fire station the next duty day, while keeping the same fire helmet and only needing to place the proper helmet shield on it for the vehicle/unit he/she was assigned to at that time.
- Reflective materials – allowed identification during low levels of lighting, night, and in smoke filled environments.

This system remained in place until the late-1990's and was replaced with an updated personnel accountability system
